

# Hydropower LCD Display for Temperature Measurement

HT67L2540A

## Characteristics

- C type LCD driver with reference voltage for good display
- Use system clock MIRC to balance power consumption with operating speed when waked up
- Extremely low standby power consumption, can operate normally even with small water flow
- Rich display content, can display the temperature in Celsius/Fahrenheit and the time of water outflow

## Block Diagram

## Applications

Hydropower water thermometer
