

Microporous Atomiser Module

BM52D5021-1

Characteristics

- Easy to operate, one touch on/off atomisation, timing atomisation functions
- 3-level atomisation power regulation
- Supports UART communication and level shifter functions
- Over-current protection function, stops operating automatically when the setting current is exceeded
- Support for BMduino (Arduino) development

Applications

Medical nebulizers, facial steamers, mini humidifiers, etc.
