

Light Intensity Sensor Module

BM62S6021-1

Characteristics

- 5V ~ 24V wide operating voltage range
- Adjustable range, maximum: 0 ~ 150000lx, minimum: 0 ~ 8738lx
- Supports RS485 transmission with high anti-interference ability
- Stores 27 hours of records offline, in 10-minute intervals
- Can be calibrated manually
- Support for BMduino (Arduino) development

Applications

Smart agricultural monitoring, meteorological monitoring, poultry breeding, etc.
