

## A03 AI Body Composition Analysis

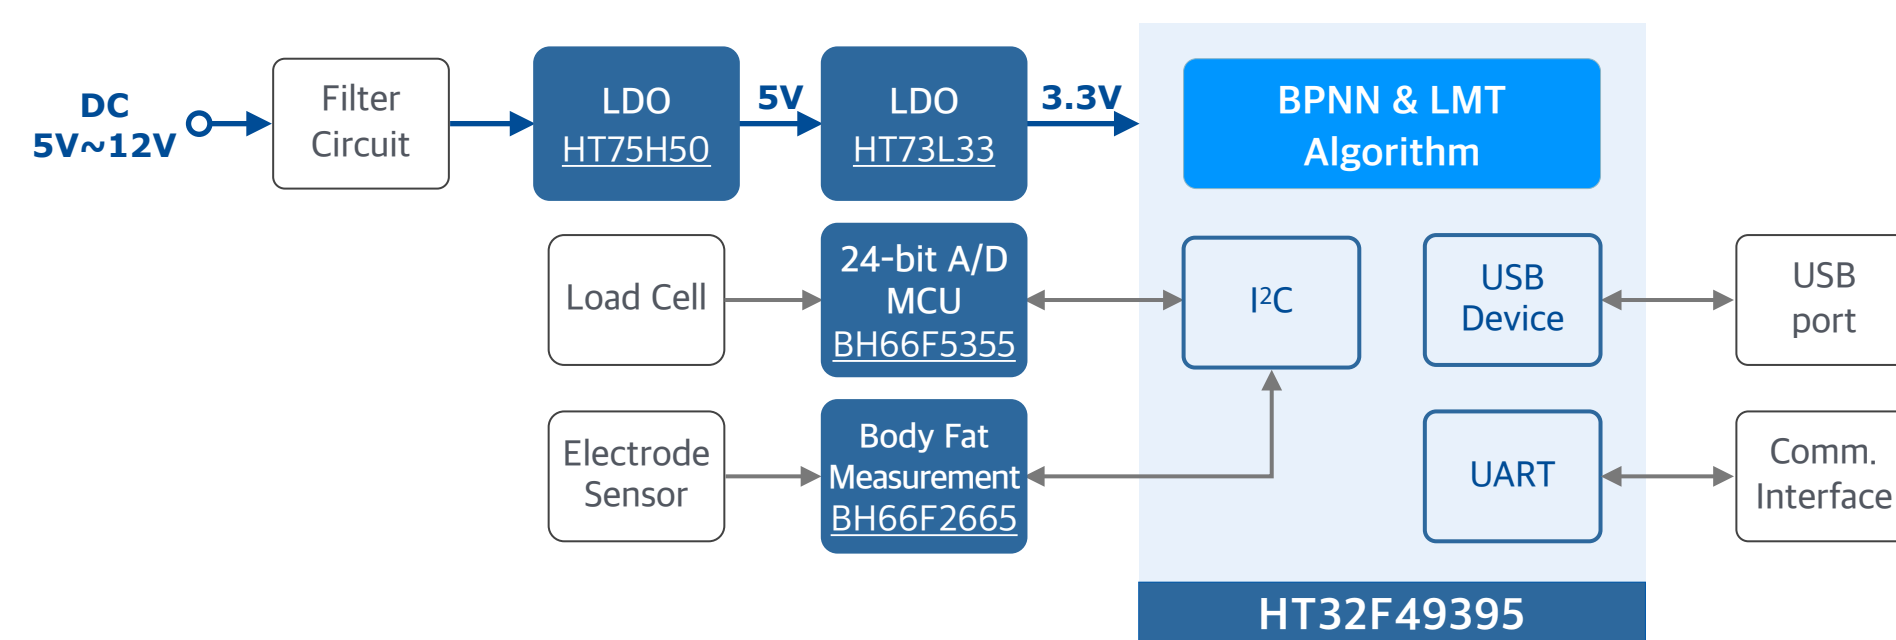

## HT32F49395

## Characteristics

- Easy to develop: Weight and impedance data can be read directly
- Flexible integration: Supports self-developed algorithms, providing about 54 composition parameters
- High accuracy solution: Supports multi-frequency eight-electrode solution, improving analysis accuracy
- Multiple interfaces: Provides UART or USB communication interfaces
- Supports IAP: Available for online program upgrade

## Block Diagram

## Applications

Body composition analyzers, etc.
