

# H02) 5.8G Radar Sensing Switch

# BM22S4422-1/HT66F0021

### **Characteristics**

- Supports wide voltage input range 12V~24V
- Sensing palm swing, automatically switches on and off devices without contact
- Adjustable sensitivity 2cm~30cm, meeting different distance requirements
- Configurable sensing output time 1s~60s, flexibly control device response time

### **Block Diagram**

## **Applications**

Sensing access control, sensing switches, etc.
